Hear Every Word™

At <INSERT PRACTICE NAME> we are committed to bringing you the latest in hearing technology and are excited about what we have to share with you today. Being able to hear and understand the television better is a top priority for many of our patients like you. Turning the volume up does not always resolve the problem and is uncomfortable for others watching TV with you. Whether you are using a hearing aid or not, we wanted to make you aware of this new technology.

We are proud to be one of the first clinics in the world to offer HyperSound Clear™ 500P, a state of the art directed audio system designed to help you hear the TV better. Here are a few features and benefits of the new HyperSound Clear™ 500P:

- Allows you to listen using your HyperSound Clear™ 500P volume control while family and friends use the TV's volume control.
- No headphones required.
- It improves sound clarity and speech intelligibility on all of your favorite TV programs, movies and newscasts. Even those hard to understand English programs!
- We can program HyperSound Clear™ 500P to your hearing profile and preferences.

We want to know what you think of this technology, so we are inviting you to be one of the first people in the country to experience the 3D immersive sound that HyperSound Clear™ 500P delivers.

**HyperSound Clear™ 500P Demonstration:
INSERT DEMO DAY, DATE, AND TIME**

Space is limited, so please call us today at (XXX) XXX-XXXX to make your reservation. For more information about HyperSound Clear™ 500P and this event or to schedule a private demonstration, please visit our website at <INSERT WEBSITE>
